

ANNUAL REPORT

2019-20

BACKGROUND OF THE ORGANISATION

Rural Action in Social Emancipation (RAISE) started in the year 2000 under the provisions of Andhra Pradesh Societies Registration Act XXI of 1860. The organization was formed with the co-operation of dedicated social workers and enthusiastic service minded group with a view to help the helpless rural poor community through various developmental activities. The birth of "RAISE" is a response indeed an emotional response to the problems of illiteracy, ignorance, ill health, malnutrition, unemployment and inadequate medical and educational facilities that were widely prevalent in Kadapa, Nellore, Karnool and Guntur Districts of Andhrapradesh, India. Hence, the Organization formed with no profit motive and dedicated to solve the identified problems.

OUR CORE VALUES

Our commitment towards a better society drives us. RAISE's core values inform all of our work. They shape what we do and how we do it. They bind us to a collective vision and purpose.

Respect

RAISE act in a manner that reflects a true belief in and appreciation for the dignity and potential of all human beings. Gaining peoples' confidence and creating an environment of trust and openness is essential to our work.

Integrity

Maintaining social, ethical, and organisational norms; firmly adhering to codes of conduct and ethical principles are inherent to RAISE.

Commitment

Using appropriate interpersonal styles and techniques to gain acceptance of ideas or plans; modifying one's own behavior to accommodate tasks, situations, and individuals involved

Rural Action In Social Emancipation (RAISE) is working for providing better future to Rural people. Registered under Societies Registration Act XXI of 1860 with registered No. 1199 of 2000. Registered under the Foreign Contributions (Regulation) Act 1979 at Ministry of Home

Affairs Government of India for receiving financial aid from Foreign Donors with FCRA No. 010160402. We have experience in dealing water issues as most of our previous projects are Providing adequate water, construction of toilets for tribal community, Construction of water tank and taps, Providing drinking water supply to zp high school. We are 11 members working under this as 7 are board members and remaining as volunteers. We are having good connection with the local people as we are working in these village since 2000 local leaders and panchayithi leaders , local officers which helps in running the project in a smooth manner

5. Child development committee had been formed

25 TOILETS CONSTRUCTION FOR URBAN POOR

The project is to construct the toilets to the urban poor. Although many families in the target area have lack of toilets, we have selected the family who are all in highest need. The selected target people are poor they cannot effort to construct toilet. the project is to help this poor by constructing the toilets.

LOCATION: sundaraiah and ngo ,nellore, backward community

AIM :

1. protecting the human dignity 2. preventing the open defecation 3. preventing of the female being vulnerable to rape 4. preventing the transmission of diseases by open defecation

Toilet construction for urban poor

Person in charge of the project: Mrs M.Divya raise3ngo@gmail.com

NGO: Rural Action In Social Emancipation

Country of execution: India

Place tvpe: Urban

PROJECT ID 439

FAMILIES 25

USD SELAVIP \$ 11,000.00

Beneficiaries: 150

Address

City: nellore

State, Region, Suburb: nellore , venkatachalam mandal , sarvepalli

Location, district, community: sundaraiah and ngo ,nellore, backward community

General purpose of project:

general purpose of project is to construct toilets to the urban poor families

Specific purposes:

It is to protect the dignity of humans.To prevent the female from vulnerable to rape.To protect the health of people from diseases.

Brief description of the project:

The project is to construct the toilets to the urban poor. Although many families in the target area have lack of toilets, we have selected the family who are all in highest need. The selected target people are poor they cannot effort to construct toilet. the project is to help this poor by constructing the toilets.

Brief description of the situation of the country:

India where the political domination is more. Here the program starts by the leaders

but the program does not complete. Proper follow up by the government will not be there which leads to incomplete projects. This causes the failure of funds that really reach the need people.

Problems you seek to solve:

1. protecting the human dignity 2. preventing the open defecation 3. preventing of the female being vulnerable to rape 4. preventing the transmission of diseases by open defecation

How does this project help to solve them?:

As the toilets constructed to the proposed urban poor the open defecation will be stopped. So human dignity can be saved, open defecation will be prevented, the female will be protected, the disease transmission will be stopped.

Experience:

yes. During 2016 we have constructed community based 10 toilets at vuyyalawada village, karnool district, andhrapradesh state.

Project guarantee:

Yes it is guaranteed. It is a sustainable solution.

Brief description of the environment:

Three seasons are there. Summer, winter and rainy season. In nellore rainy season stays for three months of October, November and December. Summer season is from April to September. winter is in December, January, February a little in March

Current legal situation of the project's place of execution:

Owned land

Is the land prone to flooding?:

No

If the project is approved, could the land be an impediment to its execution?:

No, there is no impediments in the project execution

ABOUT FAMILIES AND COMMUNITY

Brief description of the families and their characteristics:

most of them are mother, father, children and grand parents. most of them go for

daily waging work. if the young children present in the family also goes to work. As

they are poor they cannot effort to make their children educate more than 5th class.

Average number of people per family:

6

How will the families and community participate in the project development?:

They are ready to offer their physical support in construction. They are going to form a community monitoring committee. The committee contains 7 members two men, two women. three members of youth and In which they personally check the progress of the work, checking the quality and quantity of the material they are receiving, day to day work.

What type of employment do the beneficiaries have?:

Informal

Percentage of people with informal employment:

100%

Do the majority of beneficiaries have drinking water at home?:

No

Do the majority of beneficiaries have a toilet nearby?:

No

Source of energy used to cook food (please comment):

Most of them are using the firewood for the cooking purpose. Even though some have gas stove for cooking they use it only during rainy season. As these people are poor they cannot effort to maintain a gas stove

What is the system for sewage disposal (water)?:

most of them are not having sewage disposal .

Indicate the monthly average family income:

\$67USD

Indicate the percentage of households whose head of household is a woman:

40%

PARTNERSHIPS AND COOPERATION

Are there other organizations that will support the project ?:

No

Organization's names of project support?:

no data

ACTIVITIES / TEAM

Activities:

Name:

construction of toilet

Description:

construction of toilet at urban area who are in very need

Will you be able to finish the project on time?:

Yes

Comments:

we are having much experience in dealing with construction work. We have a good plan, beneficiaries and local leaders support to make it complete in the given time

Phone of the person in charge:

+917032778901

Cost by family / Selavip	440 USD		
Starting date	04/02/2019	Ending date	16/09/2019

SERGIO SAID MALDONADO

EXECUTIVE DIRECTOR SELAVIP

FOUNDATION

WATER PURIFIER TO SCHOOL BY OTF , CANADA

In venkatachalam mandal there are above 30 number of schools. Most of the schools have drinking water source either through the panchayithi or through the near by houses. But the quality of water (contaminated with the bacteria etc) has not been studied so far. So due to this and the students lack knowledge on hygiene practices ,the situation becomes worse allows them to fall sick especially during rainy season easily. Which increases decrease in attendance, as they miss

class they are back in education, eventually increasing the school drop out rate. When we made survey on the needs of schools most of them are requiring good quality of water to prevent from the disease condition.

The project focuses on educating the rural school children studying in the school on hygienic issues, the staff of the school will be trained on day-to-day maintenance of water purifier.

Thanking you

RAISE president

Mrs M.Divya
