

ANNUAL REPORT 2023-24

WOMEN'S DAY CELEBRATIONS

We have invited some newly entered sponsor girl mothers and some already been mothers. Along with them, we have invited the mothers whose main work is basket making, who don't have any knowledge regarding gender discrimination.

Along with gender equality, we have also explained the value of girl's education.

After completion of the meeting, some mothers explained the problem in their area that they want to make their daughters educated and they are sending the daughters to school, but no use. In that school, two teachers are there but they

won't teach the students. As the school is located in a backward area and the school strength is only 31, no government officials are monitoring the school.

I have called the superiors of the village and some more women from that area and motivated them to go ask the teachers why they are not showing interest in teaching their children education. Then the superior of the village told me that I have to go alone for asking but only two or three people only will come, most of them are not having knowledge regarding the value of education...Then I called the nearby school teacher. I have explained the problem. Sir told that he will definitely help. I have collected the Mandal Education officer Number and District educational officer number. But before informing them in this regard I thought that I will meet them in the school and ask in this regard. When I share my thought with Teacher he told that he also will come along with another School headmaster. The next day two teachers came and also a village elder. We all went and explained the thoughts of the village people to the school teachers. They sat silently.. I explained to them that I am having a lot of respect for the teachers, and I requested them to take care of the students. The teachers simply blamed parents that they are not showing interest to send their children to school. The teachers who came with me also explained them how to handle those types of parents. After severe explanation Teachers said that they will put their complete efforts to educate the students.

We together solved our problem

STOP LEPROSY PROGRAM

The project is designed to bring awareness and identify leprosy cases from among the tribal communities and schools of the target villages and to refer them to the hospital for treatment and cure, safeguard them from the scourge of leprosy.

Creating awareness to the people on Leprosy

Creating awareness to school children on Leprosy

Door to Door Awareness program and Survey on Leprosy

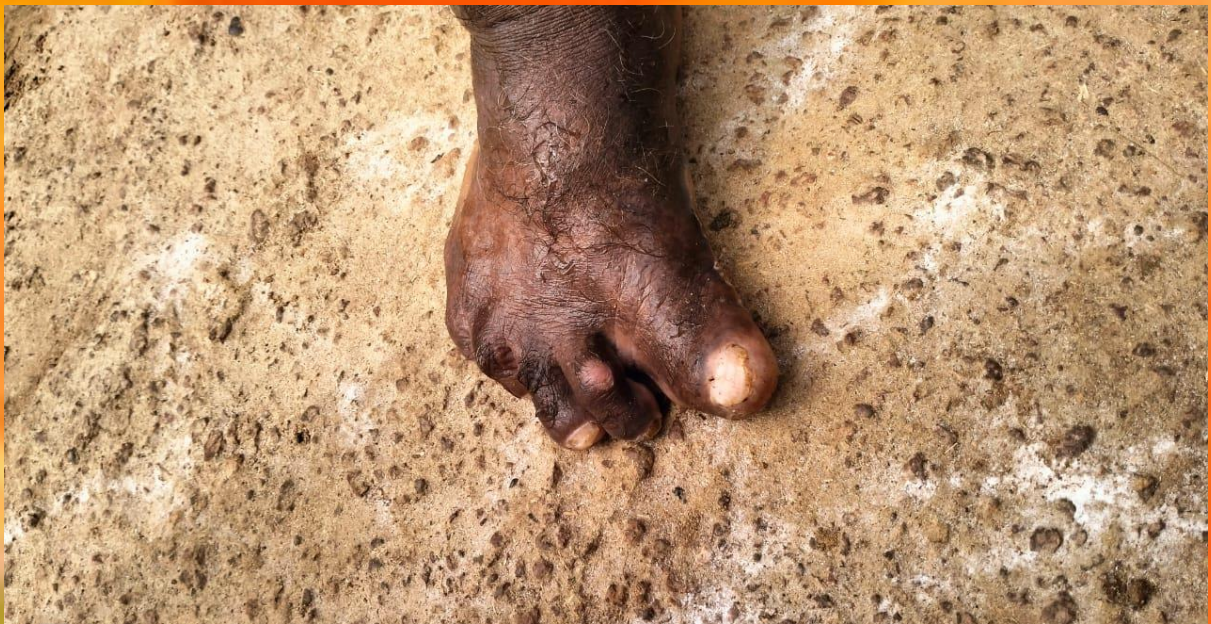

Suspecting Leprosy cases

OPPO K10

Connecting the suspected cases to the Doctor

5 villages and 10 schools got covered so far. Our team approached each family in the 5 target villages and explained the importance of health and hygiene, safe protected water, harmful diseases caused through unclean water, safe disposal of human faeces, use of toilets, hand washing, clean and hygienic environment, explained about Leprosy by showing them the pictures and taught them the preliminary tests to identify leprosy and the doubtful cases are referred to doctor, confirmed cases are proceeded with treatment.

SAVE GIRL CHILD, STOP GENDER DISCRIMINATION

(on going)

Our mission has always been to save girls' lives—to end female gendercide in our area. Girls in India are systemically under-valued and subjected to terrible injustice. We're committed to shedding light on this atrocity, combatting it, and caring for its survivors

We rescue girls. The aim of a “rescue” is to extricate a girl from a situation in which she is exploited, abused, or where her life is in potential danger. Actual or potential situations requiring a rescue may be cases of female foeticide, female infanticide, deadly neglect, abandonment, child labour, slavery, commercial sexual exploitation (trafficking), any form of trafficking (including bonded labour), early child marriage, forced marriage, or similar unlawful activities.

Once a girl is rescued and placed in the Child Sponsorship Program, the goal will be to sponsor her, support her, and educate her on her value and the perils of female gendercide, through her graduation from college

We RAISE organistaion currently working to save girl child form Child marriage, Child labour, Gender discrimination and Foeticide in the rural areas. In 2019 we have started this program , at present we have rescued 150 girls and supporting them with Care and Education.

THANK YOU
